BRITISH CRUELTY TO EGYPTIANS

PARIS, Nov. 25.—It is said that Zaki Pasha, president of the Egyptian delegation to the peace conference, has sent a cablegram to President Wilson declaring that, as a result of having faith in his principles and claiming independence for the Egyptians who fought beside the allies, they now find themselves objects of barbarous treatment at the hands of British authorities.

ALL GIRL FANS WILL BE THERE

Tonopah is to celebrate Thanksgiving to the good old American way. A ripping good football game will be staged at the ball park Thursday afternoon at 2:30 and those who "know" say it is to be the swiftest game ever played in camp. Coach Jones has a team made up chiefly of high school fellows. They have the advantage of recent practice, but Jimmie Curtin's "Old Timers" expect to hold them down, as all his men are star gridsters and know the game to a "T." Both teams are "rarin' to go," and can hardly wait till Thursday to tear into one another. It looks well for a big fight. The game is being put on as a benefit for Cordozo Ross and Frank McLoskey, the two high school boys who are in the hospital. It affords an opportunity for all to do their bit to help the boys, as well as to see a cracking good exhibition of football. Every grid fan in Tonopah ought to be out there Thursday. If he has any of the old "paw" left in him to be "thankful for."

STATES LEFT TO ENFORCE DRY LAW STRICTLY

(By Associated Press)
WASHINGTON, Nov. 25.—Enforcement of constitutional prohibition will be placed squarely on the state and municipal authorities and the federal government machinery will not interfere unless inefficiency on the part of local officials makes such action necessary, the head of ten persons of the Methodist church was sold today by John Kramer, federal prohibition commissioner. It was Kramer's first pronouncement of policy since he assumed office a week ago.

MARIETTA ORE RUNS \$3000 TON

MINA, Nov. 25.—This morning Mina's ore sold with excitement over the latest big strike reported from the Marietta country, about twenty miles from here. Jack Anderson and his partner, owners of the T & A group of five claims brought in for shipment to Selby's ten sacks of ore valued at \$3,000. This ore comes from a hole less than six feet deep, and the vein has been traced to a distance of 500 feet from the strike and at that point ore is now being sacked which averaged over \$500 per ton. Samples have been taken at various points along the vein, the best of which assayed 6,000 ounces of silver and 32 per cent lead. The width of the vein is still undetermined and the formation is said to be in a lime and shale contact. A touch of romance is associated with the strike by reason of the fact that Anderson's partner is a well known young lady of Mina, who early last spring, assisted him in preparing some documents in connection with a claim against the United States government. Out of gratitude for this, Anderson made the young lady, whose name is withheld for the present, a full partner in all claims he might state, and what this means to her is evidenced by the fact that Mr. C. A. Noble, who owns some ground close by the T & A group, this morning offered her \$25,000 cash for her interest in the single claim on which the discovery was made.

GOLD WEDGE HAS RICH GOLD ORE

Gold Wedge (Pledge) is running true to form as assays from the cross-cut started recently return high values in the yellow metal and the owner part in silver. The company is now operating in the crosscut from the 200-foot level where the formation is growing harder, indicating to experienced miners that the drifts are getting close to the walls of a ledge. Assays show the drifts consistently and one taken yesterday from the face gave a value of \$4,370 of which \$12 was in gold and the balance, \$2,110 in silver. The return is vouched for by Charles Kiehn, backed by the assayer's certificate.

Harbaugh & Co., Inc., is the name of a new company which will be received with open arms by prospectors and others having small lots of ore to dispose of. BOUGHT A REMBRANDT FOR A PALTRY SUM

(Correspondence Associated Press)
BRUSSELS, Nov. 25.—At an art sale here an amateur collector bought a picture for the equivalent of about \$80. Experts have examined it and pronounce it a genuine Rembrandt for which a Dutch museum has made an offer of \$120,000.

The Lafayette property is located about a mile east of the Kennedy ranch and to reach the remainder of the district it is necessary to follow the trail by the Lafayette shaft and thence to the Rickey Boulder and other properties. The entire district is traversed by well mineralized ledges which outcrop boldly and is said by old-time prospectors to be one of the most promising thus far opened in Nevada.

At the Lafayette property, recently taken over by Canadian mining men, development work is now in full swing and results are reported to indicate that pay ore in commercial tonnage will soon be opened. The north drift on the 100-foot level is being extended in a full face of 425 feet, with the deposit widening slightly as the drive is advanced. Operations are facilitated by means of mine machinery having lifting capacity from a depth of 800 feet.

The J. L. Giroux interests will within two weeks start development work on the Rickey Boulder group, where the surface showing is one of the best ever found in Nevada. Values run as high as 298 ounces silver and average 25 ounces silver across a breadth of four feet along the outcrop. It is planned to sink a shaft in the ledge to a depth of 100 feet and to there crosscut and prove up the vein system. Representatives of Mr. Giroux visited the property last week and laid out development plans. These plans include the sinking of a double-compartment shaft and the purchase of powerful hoisting and compressor plants.

Additional importance attaches to the Giroux purchase by reason of the fact that for more than twenty years, he was consulting engineer for the W. A. Clark mining interests, and is one of the country's most successful and best known mining men. His interest in the new district may, therefore, be accepted as being thoroughly indicative of its worth and of its ore-yielding future.

THE T. & G. RAILROAD

A forecast last week by The Bonanza, the Tonopah & Goldfield railroad resumed its fast freight service yesterday when a regular freight train passed through here en route to Mina.
